 clemzyport@gmail.com

 Lagos, Nigeria

SUMMARY

A prolific and enthusiastic product and visual designer with a knack for product success and marketability. Spanning over 3 years of experience in designs especially within the Blockchain and Cryptocurrency space, passion has been a constant drive to my continual development in motion graphics designs, animations and illustrations respectively.

EXPERIENCE

Graphics / Product Designer (Remote)

500 Nigeria Developers for Ethereum

 10/2019 - Present  Lagos, Nigeria

500ND4E is a blockchain education initiative to train 500 developers in Nigeria and across Africa, following the call to train one million developers in the Ethereum Blockchain by the Co-founder of Ethereum and Founder of Consensus, Joseph Lubin. This initiative began with me and my friend in October 2019 and since then we have trained over 350 participants in Africa with help from volunteer mentors all over the world.

- I designed the entire pilot test program and graphics required to launch the project
- I designed all mentors' profiles and course curriculum, of which some of my designs were adopted by the overall OneMillion Devs for Ethereum initiative, [View here](#).
- I conducted user survey tests on the profile of prospective students and what their expectations were of the initiative, giving me proper focus on my designing approach.
- Developed the front end of the pilot test website in 2019 and currently the new website being used now for the second ongoing session.
- Developed the product workflow which has invariably become a positive turn around for the success and development of the program, this gained myself and my partner a chance to be invited to France for the recently concluded ETHCC Paris as speakers.
- On the second launch of the program, I enhanced the user experience and design of the website using my front end development skills.
- My work with this project recently got a shout out from the Consensus Team on Twitter also, [View here](#).

Technologies: Adobe Photoshop, Illustrator, After Effects, Visual Studio Code, Git, GitHub, Jira, HTML, CSS, Javascript.

Freelance Product & Graphics Designer (Remote)

Sumotrust

04/2019 - Present

Abuja, Nigeria

Sumotrust is a savings investment platform in Nigeria that has been able to utilize one of the key usages of Blockchain by integrating a Blockchain security protocol into her system to further enhance users' funds to be securely protected from cyber-theft.

- I designed the website of the company
- I liaised with international partners in getting the Raindrop Blockchain Security API to be integrated into her system.
- As a freelancer, I occasionally design graphical content for the company's marketing and pitching.
- Developed and designed other branches of the company, with respect to logo, brand identities, and other graphical contents.

Technologies: Adobe Photoshop, Illustrator, After Effects, Audition, Premiere Pro, Media Encoder, Visual Studio Code, Git, GitHub.
